shrutikasriS

Shrutikasri04

Executive Summary

Computer Science undergraduate focused on building intelligent AI systems and scalable full-stack applications. Experienced in developing real-time interactive software and contributing to large-scale open-source projects.

Educational History

B.E Computer Science And Engineering

Kit-Kalaigarkarananidhi Institute Of Technology

2024-2028

CGPA - 8.88

Higher Secondary Education

Sri Chaitanya Techno School

2022 - 2024

Percentage - 75.2%

Relevant Skills

Programming language

Python , C , C++ , Java

Web Development

React , Next.js , Express , Node.js ,Fast API

Database

Postgresql , MongoDB
,Vector DB(FAISS)

AI & Machine Learning

Supervised & Unsupervised Learning,
Numpy , Pandas , Tensorflow , Matplotlib

Projects

Project BEN: Voice-Controlled Multi-Agent AI System

- Developed a voice-controlled AI assistant using speech-to-text and LLM-based reasoning
- Designed a multi-agent architecture with contextual memory using vector database (FAISS)
- Built an interactive desktop UI with real-time animations and automation capabilities

AI - Powered Microplastic Detection In Water

- Designed and implemented a machine learning model to identify and classify microplastics in water samples.
- Trained the model on annotated image datasets to achieve 91% classification accuracy

Open Source Contributions

OpenCV (Open Source Computer Vision Library)

- Core Contributor (4.x Branch):** Contributed high-quality code to the main branch of a world-leading computer vision library.
- Successfully navigated complex code reviews and met strict performance and documentation requirements for large-scale software systems.

Experience & Awards

National Level Project Expo

Awarded First Prize at SCIMIT'26 for a Machine Learning-based project, which detects microplastics in water, emerged as the National Winner among 450+ teams from 55+ colleges across India.

TNWISE Women's Hackathon

Achieved 4th prize in the TNWISE Women's Hackathon, demonstrating strong problem-solving, teamwork, and innovation skills in a competitive environment.

Corporate Exposure Session (2025)

Attended an industry interaction focused on talent acquisition, organisational culture, and employee engagement practices, conducted on campus.
